Sliding motor:

IID-SLM800–IID-SLM1000–IID-SLM1500 – IID-SLM2000

This sliding gate motor has the very stylish appearance and stronger cast aluminum base; The motor's magnetic reed switch was replaced by one small HALL limit switch plug in the control panel, and which can work more than 10 years' lifetime; The communication interface between two gate openers synchronize the double gates; Also, it has a variety of interface options for such as Bluetooth, WIFI and flashing lights.

IID-SLM800 – IID-SLM1000 – IID-SLM1500 – IID-SLM2000

Features:

- Thermal protection sensor protects the motor overheat after intensive use
- Gear motor non reversing, no need to install electric lock
- Manual open by release key on power failure
- Anti-crushing protection ensured by electronic device
- Soft start and soft stop, quiet and smooth performance

Technical data：

Model	IID-SLM800	IID-SLM1000	IID-SLM1500	IID-SLM 2000
Output torque（N.m）	22	27	35	55
Rated power (W)	370	550	750	1500
Max weight（KG）	800	1000	1500	2000
Power supply	AC220V 50Hz (AC110V 60Hz)			
Limit switch	Spring/Magnetic (NC/NO)			
Motor speed(r/min)	1400			
Gate speed(m/min)	12			
Noise(dB)	≤56			
Temperature(℃)	-40～+60			
Protection class	IP44
